Mamadou Moustapha Sylla

Senior Backend, DevOps & AI Engineer

sylla.mamadou.mst@gmail.com | +221 77 716 37 27 | +7 920 856 82 08 | Currently in Europe – available immediately

> **Work authorization:** Non-EU national (Senegal). Master's degree + 5 years of senior experience – eligible for the **EU Blue Card**. Languages: French (native), English (professional), Russian (professional).

PROFILE

Senior Backend, DevOps and AI Engineer with 5+ years building and operating secure, scalable, high-availability backend systems for financial and transactional platforms. Strong in **Java / Spring Boot**, API architecture and **Google Cloud Platform**, with hands-on production experience in **LLM-based chatbots and agents**, predictive ML (scoring, fraud detection) and NLP pipelines. Master's degree in Intelligent Information Systems (AI/ML).

KEY ACHIEVEMENTS

- Designed and integrated AI capabilities into production financial platforms: LLM chatbots/agents, ML scoring and fraud-detection models, NLP pipelines.
- Reduced API latency by up to **45%** through SQL query optimization and performance tuning.
- Cut deployment cycles by **70%** with automated CI/CD pipelines (Cloud Build, Cloud Run).
- Modernized legacy Java JEE systems into Spring Boot microservices.
- Implemented enterprise API security with Keycloak, Apigee policies and mutual TLS (mTLS).

PROFESSIONAL EXPERIENCE

Intouch Group – Dakar, Senegal

2022 – Present

Senior Backend, DevOps & AI Engineer (fintech / payments)

AI & Machine Learning

- Design and develop LLM-powered chatbots and intelligent agents automating customer-facing and internal workflows.
- Integrate and deploy AI/ML services into production microservices on GCP.

Cloud Architecture & DevOps (GCP)

- Architect and operate infrastructure on Cloud Run, GKE, Compute Engine, Cloud Functions, Cloud SQL, Pub/Sub, BigQuery, VPC and Load Balancing.
- Provision infrastructure as code with **Terraform** (reproducible, versioned, auditable environments).
- Build CI/CD with Cloud Build, Artifact Registry and service accounts; run containerized services on Cloud Run and Kubernetes (GKE).
- Centralized logging, monitoring and alerting; IAM, Secret Manager and TLS hardening; capacity planning, autoscaling and cost optimization.

API Platform (Spring Boot / Apigee)

- Design RESTful APIs for internal and partner consumers; OpenAPI-first documentation.
- Authentication and authorization with Keycloak (OAuth2, JWT, RBAC); Apigee proxies with routing, quotas, caching and security policies; mTLS-secured load balancers.

Core Processing (Java JEE)

- Level 2/3 production support for critical financial processing under strict SLAs.
- SQL and batch optimization, load/stress testing, migration of monoliths to Spring Boot services.

Megagorien – Bryansk, Russia

2021 – 2022

Backend Developer (ongoing AI project collaboration)

- Scalable REST APIs with Node.js and Django REST Framework; business logic and data models.
- AI initiatives: predictive ML models and NLP text-processing features.
- CI/CD with GitLab CI and Docker; Swagger/OpenAPI documentation; code reviews.

Business Pump – Moscow, Russia 2021

Trainee Backend Developer

- Backend development with Laravel/PHP: features, bug fixing, testing, solution design.

Freelance Software Developer 2018 – 2021

- Custom backend and full-stack solutions (Spring Boot, Laravel, JavaScript); database design, REST APIs, maintenance and performance work.

TECHNICAL SKILLS

Languages Java, Python, JavaScript, C++, PHP

AI & ML LLMs & generative AI (chatbots, agents, prompt engineering), NLP, scikit-learn, pandas, NumPy, predictive modeling (scoring, fraud detection), ML service deployment

Backend Spring Boot, Java JEE, Node.js, Django, Laravel, microservices

API & Security REST, OpenAPI, Apigee, Keycloak, OAuth2, JWT, mTLS, IAM

Cloud (GCP) Cloud Run, GKE, Compute Engine, Cloud Functions, Cloud SQL, Pub/Sub, BigQuery, VPC, Load Balancing, Secret Manager, Monitoring/Logging

DevOps & IaC Terraform, Docker, Kubernetes, Cloud Build, Artifact Registry, GitLab CI/CD

Databases PostgreSQL, MySQL, Oracle, MongoDB

EDUCATION & CERTIFICATION

M.Sc. Information Systems and Intelligent Technology 2019 – 2022

Bryansk State Engineering and Technology University, Russia – focus on AI, machine learning and intelligent systems.

B.Sc. Computer Science 2015 – 2019

Gaston Berger University, Senegal

Machine Learning with Python – Complete Training 2022

LANGUAGES

French – native level • English – professional working proficiency • Russian – professional working proficiency
