Application – [JOB TITLE] ([COMPANY], Munich)

Dear [COMPANY] Hiring Team,

I am applying for the [JOB TITLE] position. I am a Senior Backend, DevOps and AI Engineer with 5+ years of experience building secure, scalable systems for a payments platform.

[ONE SENTENCE LINKING THE JOB'S MAIN REQUIREMENT TO YOUR EXPERIENCE.]

Highlights:

- Java / Spring Boot microservices and REST APIs (OpenAPI), migrated legacy JEE to microservices.
- Google Cloud, Kubernetes (GKE), Cloud Run, Terraform, CI/CD that cut deployment cycles by 70%.
- LLM-powered chatbots and agents, ML scoring and fraud detection, NLP pipelines in production.
- API security with Keycloak, Apigee and mTLS; up to 45% lower API latency through optimization.

On the practical side: I am a non-EU national with a Master's degree and 5+ years of senior experience, which makes me eligible for the EU Blue Card. I am currently in Europe and available for an on-site interview in Munich at short notice.

I look forward to discussing how I can contribute to your team.

Kind regards,

Mamadou Moustapha Sylla
